Flash'U 

Network Under Pressure Tapping Brass Fittings

SECUO

SECUO Security valve

Straight or angled ND 15 to 40

- > Enables the network manager to control the metering point
- > Water consumption = water billing
- > Device for SPHERUO valves, tested one by one in our factory
- > No street pot needed, enables wet connections without corporation cock

Protection cap avoids harmful products to enter

Product +

- Difficult access
- Key hard to counterfeit
- The valve can be handled in all positions
- Permanently tamper proof

Only one key, held by the network manager = secure access

Retractable pin
One key is sufficient to handle the valve

The acquisition costs of a SECUCO will always be lower the amount of than possible deficiencies or frauds

Locking of the valve by the manager

- > In case of deficiencies
- > In case of issues
- > no risk of water theft and non detachable meter system

Loose upper part of the barrel
No grip for controlling the valve

Protection of the control levers

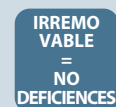

BSP threaded swage nut

100% brass valve, no electrolytic reaction

Note...

- > Exclusive tamper proof device, ready for use
- > No removal before handling
- > Only one key, kept by the manager
- > Exists in straight and angled version, ND 15 to 40

100% BRASS

WP 16 BAR

SECUO

- > For straight or angled HUOT valves
- > Full bore valves, no pressure drop
- > Inlet with male or female thread or with REXUO fittings
